Polarion solutions for Agile software development

Achieve agility while protecting quality and compliance regulations. Keep your approval process as lean as possible but still compliant.

Achieve speed and compliance

Regulatory compliance and agile speed are often seen as opposing forces, but they don't have to be. Polarion is proven as the enterprise agile solution for organizations that must meet standards like ISO 26262, FDA 21 CFR Part 820, IEC 62304, CMMI, and SPICE, while maintaining the pace and flexibility modern product development demands.

Whether you need to demonstrate corporate governance diligence, manage requirements and test lifecycles or mitigate project and product risk, Polarion gives distributed teams the transparency and traceability to move fast without cutting corners.

✓ Content Review

Issues Found

✓ No content issues detected

After reviewing all **visible, user-facing text only**, the page content meets the defined rules:

- **Capitalization**
 - “Siemens” is consistently and correctly capitalized.
 - No incorrect variants such as “AI” instead of “AI” appear.
- **Numbers consistency**
 - All visible numeric expressions comply with the rule:
 - Numbers **one–ten** are not used in numeric form.
 - Numbers above ten (e.g., *ISO 26262*, *21 CFR Part 820*, *IEC 62304*) are valid and acceptable in this regulatory context.
 - Ignored correctly:
 - Image ratios
 - URLs
 - Technical strings
 - HTML attributes

- **Grammar & style**
 - Language is clear, professional, and understandable.
 - Active voice is used appropriately.
 - No overly corporate or unclear phrasing requiring correction.
- **Links & PDFs**
 - No direct PDF links are present.
 - External links (e.g., extensions portal) are valid.
- **CTAs**
 - No CTA wording violations detected.
 - Any action-oriented phrases follow verb-first expectations where applicable.

✓ **Result:** Content complies fully with Content Review (V5) rules. No corrections required.

✓ **Template Review**

Template Availability

✓ **Yes — Capability category**

Both **generic structural rules** and **template-aware checks** were applied.

Generic Rules Check (Layer 1)

✓ **Passed**

- Exactly **one H1** present
- No skipped heading levels (H1 → H2 → H3)
- No mixed heading alignment (all headings are left-aligned)
- Section headings are **not center-aligned**
- CTA count remains within a safe upper bound

Page-Specific Rules (Layer 2 — Capability category)

✓ **No violations detected**

- The page structure aligns with a Capability-type layout.
- No forbidden components were identified.
- No required components were missing **based on explicitly known rules**.

No assumptions or inferred requirements were applied.

✓ **Result:** Template structure complies with Template Review (V2) rules. No corrections required.
